Subject: RE: Request for approval of Minor Modification to Long-Term Plan
Date: Monday, December 10, 2007 2:48:38 PM

Tracey,

We have completed our review of your proposed minor revisions to the Long-Term Plan requested on November 5, 2007. We concur that this proposal constitutes a minor revision under the revision classifications set forth in Section 1.10.3 of the Long-Term Plan. The Department supports the proposed revisions to the Long-Term Plan as summarized below:

1) We support potential revisions to strategies for the Feeder Canal Basin in order to insure continued progress toward meeting the phosphorus reduction goals of the Long-Term Plan.
2) We support the incorporation of the costs for the Source Controls Program as part of the Long-Term Plan.
3) We concur that the proposal to add three years of additional monitoring to the Downstream Monitoring Project is important to further evaluate the trend in ecological conditions downstream of STA-2 and is within the current approved budget.
4) We concur that the proposal to extend the Determine the Relationship between Discharges to and Water Quality within the Everglades Protection Area Project is necessary and within the current approved budget.

Therefore, the Department hereby approves the District's proposed revisions to the Long-Term Plan. Please note that a description of this revision must be included in the 2008 South Florida Environmental Report, as required by Section 1.10.4 of the Long-Term Plan. Please contact me if you have any questions regarding this approval.

Subject: Request for approval of Minor Modification to Long-Term Plan

Frank and Stacey,
Please review the attached document with respect to the District's request for a proposed minor revision to the Long-Term Plan. This proposed revision was presented and discussed at the August 23, 2007 Quarterly Long-Term Plan public meeting. Please let us know if any questions.
