	433 (3900) Map Number ^(chloride)	† PWS = Public Water Supply	

Well and chloride information was obtained from USGS and SFWMD records. Chloride values are given in milligrams
per liter (mg/L). Map data represent the average of available chloride values for the period of April/May 2009.
Graphs of selected wells represent the period of record for each well through May 2009. The dashed isochlor line
marks an approximation of the farthest inland extent of the saltwater interface as defined by the 250 mg/L chloride
concentration in groundwater and/or the farthest inland extent of saline surface water. The 2009 isochlor was
updated in 2014/2015 to incorporate new and corrected data.
