CITY OF DELRAY BEACH PUBLIC WATER SUPPLY

Structures	Chlorides	Wellfield Areas
Lock	<=100 mg/L	Saline Water Bodies
8 Pump	🔷 101 - 250 mg/L	Freshwater Bodies
 ■ Spillway	251 - 1,000 mg/L	Mangrove and Saltwater Marsh
v Weir	▲ >1,000 mg/L	— Roads
	Wells	··· Estimated 250 mg/L isochlor, 2009 (updated)
	433 (3900) Map Number(chloride)	Estimated 250 mg/L isochlor, 2014

Well and chloride information was obtained from USGS and SFWMD records. Chloride values are given in milligrams per liter (mg/L). Map data represent the average of available chloride values for the period of March/April/May 2014. Graphs of selected wells represent the period of record for each well through May 2014. The dashed isochlor lines mark an approximation of the farthest inland extent of the saltwater interface as defined by the 250 mg/L chloride concentration in groundwater and/or the farthest inland extent of saline surface water. The dashed red line corresponds to 2014 data; and the dashed blue line corresponds to 2009 data (updated to reflect a better understanding of saline surface water).
