

Inter-laboratory Comparability of Split-Sample Results

The red solid lines are regression lines. The 95% C.I. around the regressions are shown by dashed black lines.

Split-sample Results Reported by FDEP and PPB between February 2000 and May 2000

Note: SFWMD was not included prior to June 2000.

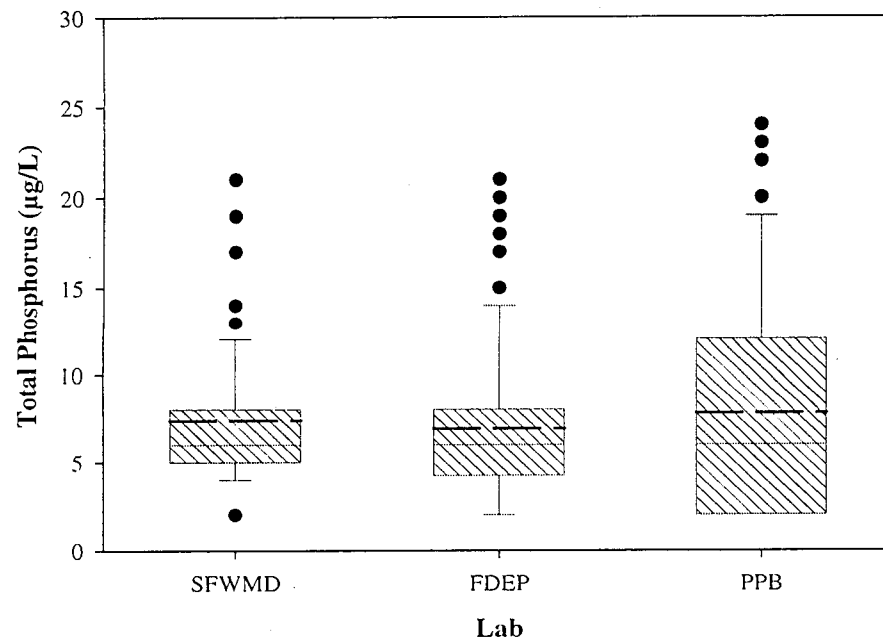

Paired t-test

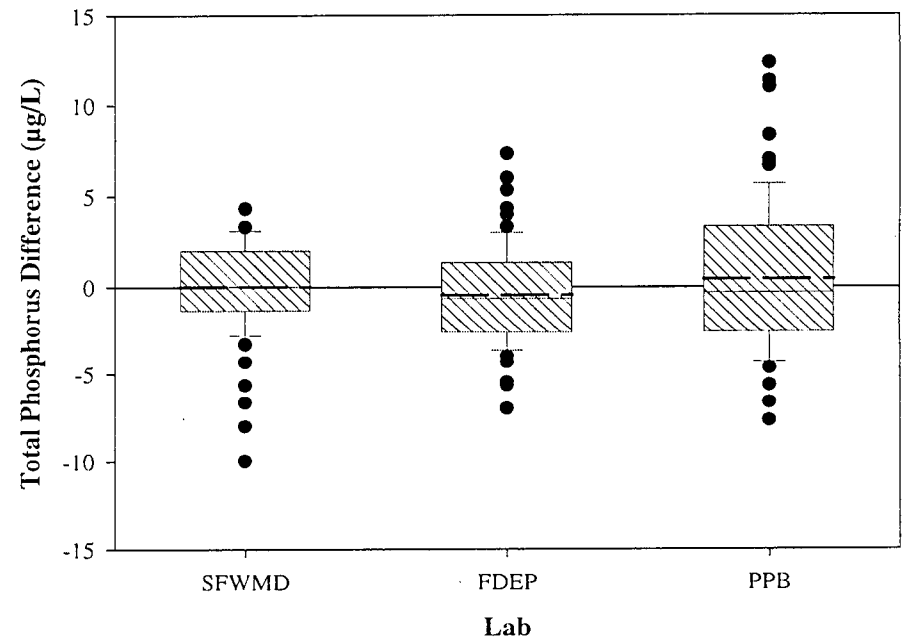

Mean Difference (FDEP-PPB)	-16.00
t (mean = 0)	-5.76
Significance (p)	<0.0001

Summary of Split-sample Results Reported by SFWMD, FDEP, and PPB between June 2000 and December 2000

Reported Values

Difference from Average Result

Monthly Geometric Mean \pm std. dev. Total Phosphorus Concentrations at C-111 Structures
