Orange highlighted and bolded months' geomeans were higher than interim limits.  
 Yellow highlighted and bolded months' geomeans were higher than long term levels.  
 Green highlighted and italicized months' levels were not applicable (N/A) because the average stages were less than 15.42 feet.

### Refuge Monthly Inflow Load

TP loads are calculated using "no ratio-adjustment" and "14 day maximum for auto sampler composite concentration" algorithm.
