
Big Cypress Basin Integrated Hydrologic-Hydraulic Model

Prepared by DHI Inc. for
South Florida Water Management District

FINAL REPORT

Big Cypress Basin Integrated Hydrologic-Hydraulic Model

January 2002

CONTENTS

0	EXECUTIVE SUMMARY	V
1	INTRODUCTION	1
1.1	BACKGROUND AND OBJECTIVES	1
1.2	BIG CYPRESS BASIN WATERSHED	3
1.3	MODEL APPROACH.....	5
2	INPUT DATA AND MODEL SET-UP	9
2.1	METEOROLOGICAL INPUT.....	9
2.1.1	<i>Rainfall</i>	9
2.1.2	<i>Potential Evapotranspiration</i>	12
2.2	CHANNEL FLOWS	15
2.2.1	<i>Major Flowways</i>	15
2.2.2	<i>MIKE 11 Channel Network</i>	17
2.2.3	<i>Channel Cross-sections</i>	18
2.2.4	<i>DEM and Floodplain Cross-sections</i>	20
2.2.5	<i>Quasi-2D Flow</i>	22
2.2.6	<i>Bed Resistance</i>	22
2.2.7	<i>Aquifer Leakage</i>	25
2.2.8	<i>Hydraulic Control Structures</i>	25
2.2.9	<i>Culverts</i>	27
2.2.10	<i>Boundary Conditions</i>	27
2.2.11	<i>Initial Conditions</i>	30
2.3	OVERLAND FLOW SET-UP	32
2.3.1	<i>Surface Slope</i>	32
2.3.2	<i>Detention Storage and Flow Resistance</i>	32
2.3.3	<i>Boundary Conditions</i>	34
2.3.4	<i>Separated Overland Flow</i>	34
2.4	LAND USE AND EVAPOTRANSPIRATION	36
2.4.1	<i>Land Use Distribution</i>	36
2.4.2	<i>Vegetation Specific Parameters</i>	37
2.5	UNSATURATED ZONE	40
2.5.1	<i>Characteristic Soils and Soil Distribution</i>	41
2.5.2	<i>Soil Physical Parameters</i>	44
2.5.3	<i>UZ-Column Discretization</i>	44
2.6	GROUNDWATER FLOW	44
2.6.1	<i>Geological Model</i>	45
2.6.2	<i>Hydrogeological Parameters</i>	50
2.6.3	<i>Boundary Conditions</i>	51
2.6.4	<i>Groundwater Water Allocation</i>	51
2.6.5	<i>Drainage</i>	52

2.7	IRRIGATION	56
2.7.1	<i>Irrigation Demand</i>	56
2.7.2	<i>Irrigated Crops and Areas</i>	57
2.7.3	<i>Irrigation Water Distribution Method</i>	58
2.8	SIMULATION CONTROL PARAMETERS	60
3	MODEL CALIBRATION AND VALIDATION.....	61
3.1	MODEL PARAMETERS.....	63
3.2	MAIN CALIBRATION PARAMETERS.....	65
3.3	FIELD OBSERVATIONS	67
3.4	CALIBRATION TARGETS	70
3.5	MODEL RESULTS.....	72
3.5.1	<i>Faka Union Canal</i>	72
3.5.2	<i>Golden Gate Main Canal</i>	83
3.5.3	<i>Airport Road Canal</i>	98
3.5.4	<i>I-75 Canal</i>	98
3.5.5	<i>Cocohatchee Canal</i>	102
3.5.6	<i>Henderson Creek</i>	110
3.5.7	<i>Barron River</i>	117
3.5.8	<i>Imperial River Watershed</i>	122
3.5.9	<i>Corkscrew Sanctuary</i>	122
3.5.10	<i>Lake Trafford and Camp Keais Strand</i>	131
3.6	SUMMARY	136
4	WATER BALANCE.....	137
5	FLOODING.....	141
5.1	FLOOD MAPS.....	141
5.2	25-YEAR STORM EVENT.....	149
5.3	SUMMARY	155
6	GENERAL RESULTS.....	155
6.1	GROUNDWATER MAPS	155
6.2	GROUNDWATER RECHARGE	160
6.3	CHANNEL/GROUNDWATER INTERACTION	165
7	DEMONSTRATION OF MODELING.....	170
7.1	SCENARIO 1 - HYDROLOGIC RESTORATION OF SOUTHERN GOLDEN GATE ESTATES (SGGE).....	170
7.1.1	<i>Description</i>	170
7.1.2	<i>Model Set-up</i>	171
7.1.3	<i>Results</i>	175
7.2	SCENARIO 2 – HENDERSON CREEK DIVERSION.....	190
7.2.1	<i>Model set-up</i>	190
7.2.2	<i>Results</i>	190
7.3	SCENARIO 3 – CORKSCREW CANAL CONNECTOR.....	196

7.3.1	Model set-up	196
7.3.2	Results.....	196
8	CONCLUSION.....	202
9	REFERENCES.....	203
10	LIST OF FIGURES	205
11	LIST OF TABLES	211
 APPENDIX A: CD containing 3 flood animations for 1995 calibration, 25-year storm and scenario		
 APPENDIX B: Water level profiles for calibration and 25-year storm event
