

Commodity Code Selection

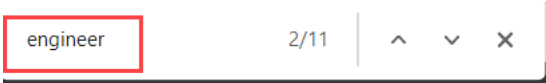

The South Florida Water Management District (District) utilizes 5-digit commodity codes that are loosely based on the National Institute for Government Purchasing's (NIGP) 5-digit Commodity and Service Code.

District Vendors are required to maintain at least one (1), but no more than five (5), 5-digit commodity codes from the *Commodity Codes (Class and Subclass List)* (List).

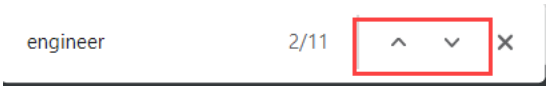

Commodity codes beginning with 0-8 represent materials or equipment that firms sell; and those beginning with a 9 represent services or rental of equipment that firms offer, including materials used for that service.

Instructions:

- 1. To search the List, select “CTRL-F” on your keyboard.
- 2. Use root words to search for the desired commodity code(s).

- 3. Select “Enter” on your keyboard to move to the next occurrence; or use the “Previous Record” and “Next Record” arrows to move throughout the document.

- 4. To ensure the appropriate commodity code is selected, refer to the bolded 3-digit class header and validate it is applicable to the materials, equipment, or services being offered.

Please contact Central Master Data Management directly at cmdm@sfwmd.gov or (561) 682-2003 with any questions related to commodity code selection.
