Section I: Supplemental Information for State 404 Program Permits

State 404 Program authorization is required for activities within state-assumed waters under Chapter 62-331, F.A.C. The following information is necessary to facilitate the State 404 Program review when a project is within state-assumed waters.

- 1. Identify the project purpose. (*Describe the purpose and need for the proposed project. Why are you proposing the work? How will you use the proposed structure(s); and/or, how will the proposed fill area(s) be used?*) Include a description of any related activities that may be developed as a result of the proposed project. Provide the approximate dates you plan to both begin and complete all work:
- 2. List all other certificates or approvals/denials received or pending from federal, state, or local agencies for work affecting wetlands and/or other surface waters encompassed by the overall project site: (*You need not have obtained all other permits before applying for a State 404 Program permit.*)

Agency	Action Type	ID Number	Date Applied	Date Approved/Denied

- 4. Identify the specific reason/need for the proposed activity (What will the activity be used for and why? Include activities that are linked to or reasonably related to the proposed activity.)
- 5. Provide an alternatives analysis as described in the 404 Handbook, Appendix C.
- 6. Describe any listed species or designated critical habitat that might be affected by, or is in the vicinity of, the proposed activity. Include the name(s) of those listed species or critical habitat areas. Describe any actions proposed to be taken to avoid or minimize adverse effects to listed species. Provide any other available data and information necessary for purposes of reviewing impacts to state and federal listed species.
- 7. Clearly show location and extent of all wetlands and other surface waters, delineated in accordance with Chapter 62-340, F.A.C. Label all special aquatic sites (e.g., wetlands, sanctuaries and refuges, mudflats, vegetated shallows, and riffle and pool complexes). Each type of boundary (for example, ordinary high water line, mean high water line, wetlands, or other special aquatic sites) must be clearly annotated and/or symbolized to ensure they are differentiable on the map. Unless indicated below, all wetlands and other surface waters on the site, as delineated in accordance with Chapter 62-340, F.A.C., that will be impacted by the proposed activities will be evaluated for permitting purposes under Section 404 of the Clean Water Act.
 - □ Check this box if you do not accept that all or a portion of the wetlands and other surface waters on the site are jurisdictional under Section 404 of the Clean Water Act, and provide documentation demonstrating which wetlands and other surface waters on the site are not jurisdictional, using reasonable scientific judgement.

Form 62-330.060(1) - Application for Individual and Conceptual Approval Environmental Resource Permit, State 404 Program Permit, and Authorization to Use State-Owned Submerged Lands Incorporated by reference in subsection 62-330.060(1), F.A.C. (effective date 12/22/2020) Section I, Page 1 of 2

- 8. Provide the complete names and full correct mailing address of the owners (public and private) of properties contiguous to the overall project site where the work is proposed. You may also provide email addresses, if available. Use additional sheets as necessary. (*This information may be obtained from your County Property Appraiser Office, which is typically accessible on the Internet; this information is needed so that, if required, the contiguous owners may be notified of the proposed activity (for example, through a public notice.)*
 - 1. Name: Mailing Address: City, State, Zip Code: Email:
