

**Approved Audit Plan
For Fiscal Year 2021-2022
and
Long-Term Audit Plan for
Fiscal Years 2023-2027**

**Prepared by
Office of Inspector General**

J. Timothy Beirnes, CPA, Inspector General

SOUTH FLORIDA WATER MANAGEMENT DISTRICT

MEMORANDUM

To: Audit and Finance Committee Members

From: J. Timothy Beirnes, CPA, Inspector General,
Office of Inspector General

Date: November 22, 2021

Subject: **Approved Audit Plan for Fiscal Year 2021-2022 and
Long-Term Audit Plan for Fiscal Years 2023-2027**

A handwritten signature in blue ink, appearing to be "JTB", is written over the "From:" field of the memorandum.

I am pleased to present our Approved Audit Plan for Fiscal Year 2021-2022 and Long-Term Audit Plan for Fiscal Years 2023-2027. The development of the plan was shaped using a systematic approach to help us decide what audits need to be done. The planning process helps us to develop the theme for our audits and identify an appropriate mix of various types of audits. The audit plan helps us to determine how we can best allocate our resources and capitalize on our individual strengths.

Effective audit planning is crucial to the success of the Inspector General's Office. Our planning process involves understanding our responsibility, recapping where we have been, and identifying the auditable universe and the risks associated with various programs and activities. The Internal Audit Charter requires the Audit and Finance Committee to approve the final annual audit plan. The Audit Plan for Fiscal Year 2021-2022 and Long-Term Audit Plan for Fiscal Years 2023-2027 was approved by the Audit and Finance Committee on November 10, 2021.

Our Guidance

The first step in our current planning process was to ask ourselves what is the Inspector General Office's mandate. Our mandate to perform audits is clearly specified in Section 20.055 F.S., *Agency Inspectors General*. It states that in carrying out our audit mandate we should:

1. Review and evaluate the internal controls that ensure fiscal accountability.
2. Review post audit sampling of payments and accounts, where appropriate.
3. Advise in the development of performance measures for evaluating District programs.
4. Conduct financial, compliance, electronic data processing and performance audits of the District.

**Approved Audit Plan FY 2021-2022 and
Long-Term Audit Plan for FY's 2023-2027
November 22, 2021
Page 2 of 3**

While the scope and assignment of audits is entirely left to the discretion of the Inspector General, the statute provides that the agency head may, at any time, direct the Inspector General to perform an audit of a program function or organizational unit. In the past, we received a number of requests from both the Governing Board and District staff to perform necessary Inspector General projects. Therefore, executing our work plan necessitates flexibility to accommodate special requests and investigations.

Our Planning Approach

Each year the District prepares a five-year Strategic Plan to guide management and staff in fulfilling the District's mission. The Strategic Plan for 2022-2027 is the product of the yearly planning cycle, which is the approach to establishing priorities, allocating resources, implementing projects, and providing accountability. The budget process then allocates resources to accomplish the planned activities.

Our audit planning process began with reviewing the Strategic Plan for 2022-2027 and the FY 2021-2022 Budget to identify those programs, activities and functions that we consider present potential risk to the District. In addition to specific programs, we also focused on identifying processes that are critical to the planning cycle that affect all programs.

The audit plan reflects a consideration of risk and its relationship to the District's mission and objectives. The most ubiquitous risks to the District's mission revolve around spending, operations, data integrity and reliability, disaster recovery/contingency planning, regulatory compliance, and public perception. Some District programs, such as our many restoration projects, depend on land acquisition and construction processes, which represent high risks due to the mere magnitude of the financial resources to be consumed. Others, such as regulation, have inherent risks that are not necessarily related to program expenditures or dollar magnitude but rather represent high risk due to the nature of the function where consistency, objectivity, integrity, and strict adherence to rules and regulations are essential.

Our audit planning process is designed to provide sufficient coverage over time to reach all significant programs, activities, and functions. Thus, the audit plan also includes the Long-Term Audit Plan for Fiscal Years 2023 through 2027, which itemizes the audit projects we envision for the audit planning cycle over the next five years. The Long-Term Audit Plan will be updated annually to reflect a rolling five-year outlook of future audit projects and to incorporate modifications as needed to reflect the Governing Board's and management's audit priorities.

During FY 2021-2022, we will continue to use our best judgment in prioritizing audit activities so as to be responsive to the most immediate needs of the District's Governing Board and executive management. The approved work plan for FY 2021-2022 provides audit projects for specific District programs, as well as, audits of processes that affect all District programs.

**Approved Audit Plan FY 2021-2022 and
Long-Term Audit Plan for FY's 2023-2027
November 22, 2021
Page 3 of 3**

Provision is also made for following up on the status of implementing prior audit recommendations as required by *Government Auditing Standards* and the District's *Internal Audit Charter*. Additionally, the audit plan provides flexibility to investigate Whistle-blower complaints and for special audit requests from the Governing Board and senior District management.

The attached schedules present the Approved Audit Plan for Fiscal Year 2021-2022 and Long-Term Audit Plan for Fiscal Years 2023 – 2027.

	Office of Inspector General Peer Review	

**South Florida Water Management District
Office of Inspector General
Approved Audit Plan for Fiscal Year 2021-2022**

Division	Bureau/ Section	Project Title	Background	Objectives	Rational for Audit	Estimated Resources
Audit Projects						Hours
Administrative Services	Finance	GASB Statement No. 87 Implementation	The Governmental Accounting Standards Board (GASB) recently issued Statement No. 87 establishing standards of accounting and financial reporting for leases by lessees and lessors. The requirements apply to financial statements of all state and local governments. The new statement will affect accounting for the District's real estate, building and equipment leases as well as Dispersed Water Management agreements. GASB 87 will be effective for the District's 2021 fiscal year. Due to the complexity of the new standard and the number of District lease agreements, implementing the new standard will require a significant amount of time by various District staff.	This project will entail assisting Finance with implementation of GASB 87 and provide a pre-audit of the final analysis to determine whether the standard has been properly implemented. It will also entail coordinating with the District accounting firm, RSM to ensure that the new standard is properly implemented.	Many other governments are incurring considerable expense to hire consultants to assist with implementing GASB 87. The IG assistance with help avoid incurring such expense.	400
Administrative Services	Finance	Audit of Fixed Assets Processes and Procedures	The District has established policies, procedures, and process for acquiring, safeguarding, transferring, and disposing of fixed assets. The policies incorporate requirements specified in Florida Statutes. Assets are recorded in the SAP system and periodic physical inventories are performed.	Provide an independent review of the District's asset management processes and procedures for fixed assets; including a comparison of the District's procedures to industry best practices in order to identify potential improvements.	The fixed asset field staff and fixed asset accounting staff were consolidated into a single organizational unit. The audit will identify best practices for potential improvements to incorporate into District practices.	530
Administrative Services	Finance	Audit of Investment Management	A significant portion of the District's revenues comes from seasonally collected Ad valorem taxes. As a result, cash inflows generally exceed outflows from November through February. The excess cash inflow is invested until needed to cover the negative cash flows that occur during the remainder of the year.	Determine whether adequate internal controls related to investment management are in place and functioning properly to ensure that investment purchases are made in accordance with the Investment Policy and properly recorded in District financial records. This will be accomplished by 1) Assessing compliance with the District's investment policy and state statutes; 2) verifying that investment transactions were properly recorded; and 3) reviewing the process for projecting cash flow and maintaining liquidity.	Cash management is essential to good fiscal management. The last audit of this program was in FY 2016.	540

South Florida Water Management District
Office of Inspector General
Approved Audit Plan for Fiscal Year 2021-2022

Division	Bureau/Section	Project Title	Background	Objectives	Rational for Audit	Estimated Resources
Office of Everglades Policy & Coordination	Office of Federal Policy & Coordination	Audit of RECOVER Program	RECOVER is an arm of the Comprehensive Plan (CERP) responsible for linking science and the tools of science to a set of system-wide planning, evaluation and assessment tasks. RECOVER'S objectives are to (1) Evaluate and assess Comprehensive Plan performance, (2) Refine and improve the plan during the implementation period, and (3) Ensure that a system-wide perspective is maintained throughout the restoration program.	We will review the original agreement for RECOVER and determine where the District and U.S. Army Corps of Engineers' are today in terms of expenditures and expected deliverables and the future course for the program.	RECOVER is a function of Everglades Restoration, the District's largest program.	460
Office of Everglades Policy & Coordination	Office of Federal Policy & Coordination	Audit of Comprehensive Everglades Restoration Program (CERP) Real Estate Cost Share	The Water Resources Development Act of 2000 (WRDA 2000) established the framework for the Comprehensive Everglades Restoration Plan (CERP). WRDA 2000 required integration of Federal and State projects and activities related to CERP and provides for 50/50 cost sharing between the Federal (USACE) and the non-Federal Local Sponsor (SFWMD). The District is providing most of the land and some of the engineering and construction cost while the USACE will incur a larger portion of the engineering and construction cost. Programmatic costs are also cost shared 50/50.	Examinee the District's process for preparing In-Kind Credit Requests to ensure the District is requesting credit for all eligible costs related to the CERP Project. The audit will also assess whether adequate supporting documentation is maintained for such expenditures.	Failure to claim credit for eligible expenditures that may have been overlooked would result in additional cost to the District.	550
Real Estate & Land Mgt / Administrative Services	Real Estate Acquisitions / Budget	Audit of Land Sale Proceeds	Proceeds from District land sales may have restrictions as to how they may be used. Such restrictions are often tied to the original source of funds used the originally acquire the land. If land sale proceeds are used inappropriately, the District may be liable to reimburse such funds.	Determine that land sale proceed are used in accordance with State statutes.	This will be the initial audit of this subject matter.	550
Regulation	Water Use	Audit of Consumptive Water Use Permit Compliance (CUP) Enforcement	A consumptive water use permit allows the holder to withdraw a specified amount of water from the ground aquifers, a canal, lake, or river for reasonable-beneficial uses. The permits set limits on how much water can be withdrawn at each location in the aquifer or from surface water. Water use compliance staff monitor the use of water to make sure the permit's limiting conditions are met. On-location site inspections also help determine compliance and document project activities, withdrawal facilities, and unpermitted uses of water.	Determine whether Regulation's Water Use Bureau is sufficiently ensuring that permit holders are complying with the limiting conditions of their water use permits and whether compliance with the limiting conditions specified in water use permits are sufficiently monitored and enforced.	The consumptive water use enforcement process was previously audited in FY 2007. This audit will address whether current enforcement processes and resources are sufficient to ensure compliance with water use permits.	530

Office of Inspector General
Approved Audit Plan for Fiscal Year 2021-2022**

Division	Bureau/ Section	Project Title	Background	Objectives	Rational for Audit	Estimated Resources
Information Technology	Network and SCADA Operations	Network Perimeter Security Audit	Network perimeter security is a proactive process to ensure the protection of the enterprise's data, assets, and information that are stored on computer equipment residing on a network, and the information flowing through the network. Security is built on the concept that layers of security components and processes, when aggregated, provide the necessary protection from unauthorized access to the network. Examples of such component and processes generally include: firewalls, intrusion detection, penetration testing, etc. Network security begins with a strong security policy.	Objectives of this audit will include: 1) Providing an independent assessment relating to the effectiveness of the network perimeter security and its alignment with the IT security architecture and policy. 2) Providing an evaluation of the IT function's preparedness in the event of an intrusion. 3) Identifying issues that affect the security of the enterprise's network. 4) Reviewing the Identity Management System to ensure that it is fulfilling its intended purpose and that administrative controls are sufficient.	Our last Network Perimeter Security Audit IT was in FY 2015.	660
Information Technology	IT Operations Section	2022 Audit of Internal Controls Over DMV Data	District employee's driving records are received monthly from the Florida Department of Highway Safety and Motor Vehicles (DMV). The data is reviewed by the Occupational Safety manager for current driver license suspensions, and other major infractions, for those employees authorized to drive District vehicles. The data is received pursuant to a Memorandum of Understanding (MOU) with the DMV.	Determine whether District internal controls related to the drivers license information received from the DMV are sufficient to ensure that DMV records are adequately protected from unauthorized access, distribution, use, modification, or disclosure.	Section VI. A. of the MOU requires the District to complete this audit to ensure proper and authorized use and dissemination of the DMV data.	100

South Florida Water Management District
Office of Inspector General
Approved Audit Plan for Fiscal Year 2021-2022

Division	Bureau/ Section	Project Title	Background	Objectives	Rational for Audit	Estimated Resources
Recurring Audit Projects						
Ecosystem Restoration and Capital Projects	Engineering and Construction	Monitoring of Construction Change Orders	District is executing large construction contract for restoration projects. Most contractors are selected through a fixed sealed bid process. Change orders can potentially add to the already significant cost of these projects resulting in projects running over budget.	On an on-going basis, periodically verifying cumulative change order amounts as a percentage of original construction contracts and compare such to industry averages.	The District's various environmental restoration projects entails executing many large construction contracts. These contracts are generally awarded through a fix bid process. Change orders for these contracts can potentially add significant additional cost to projects. Controlling change order costs are essential to ensuring projects are completed on time and within budget.	220
Administrative Services	Procurement	Monitoring of Procurement Card Transactions	The District issues procurement cards to certain District employees to provide an efficient payment method for small purchases. The Procurement Department manages the program.	Periodically examine procurement card transactions to ensure that they are: 1) Appropriate District expenditures. 2) Contain adequate supporting documentation. 3) Properly recorded in the accounting records.	Although procurement cards are used to pay for small purchases, they represent a significant number of transactions annually.	230
Administrative Services	Procurement/ All Bureaus	Monitoring of Negotiated Contract Work Orders	The District engages firms for various types of services under work order type contracts. Firms are prequalified through a Request for Proposal (RFP) or Request for Qualifications (RFQ) process and work orders are negotiated with the prequalified firms as services are needed.	Periodically select a sample of contracts to ensure that work orders are properly negotiated in a manner that maintains the District's best interest.	The work order contract approach provides significant efficiency to the procurement process; however, it also increases the risk that staff may not represent sufficient diligence in negotiation the best possible cost for the District. Continuous audit oversight of negotiated work orders will assist in mitigate this risk.	230
All Divisions	All Bureaus	Audit Follow-Up	Generally Accepted Government Audit Standards require follow-up regarding the implementation status of pervious audit findings and recommendations.	Verify that recommendations in prior audit reports have been appropriately implemented in a timely manner and provide a written report to the Executive Management team and the Governing Board.	Follow-up on previous audit recommendations is required by Government Auditing Standards and the District's Internal Audit Charter.	160
All Divisions	All Bureaus	Investigate Whistle-Blower and Other Complaints	The Office of Inspector General periodically receives Whistle-Blower complaints. Our office has a statutory responsibility to investigate these complaints and issue a report of our findings and conclusions.	Review each complaint to assess its validity. Whistle-blower complaints are received intermittently during the year.	The IG is responsible for performing investigations per Section 20.055, F. S., and the District's <i>Internal Audit Charter</i> .	1000
All Divisions	All Bureaus	Audit Requests from Governing Board and Senior District Staff	The Inspector General's Office will entertain requests for audit and investigations from Governing Board and Senior District Staff on an as needed basis.	As specified in the Inspector General Act & District Policy (Internal Audit Charter)	Provides flexibility in the audit plan to accommodate special requests for audits and investigations from the Governing Board and senior management that arise throughout the year.	250
