# Application of the Lake Okeechobee Regulation Schedule (LORS2008) on 07/27/2020 (ENSO Neutral Condition)

### **Lake Okeechobee Net Inflow Outlook:**

The Lake Okeechobee Net Inflow Outlook has been computed using 4 methods: Croley's method<sup>1</sup>, the SFWMD empirical method<sup>2</sup>, a sub-sampling of Neutral years<sup>3</sup> and a sub-sampling of warm years of the Atlantic Multi-decadal Oscillation (AMO) in combination with La Nina ENSO years<sup>4</sup>. The results for Croley's method and the SFWMD empirical method are based on the CPC Outlook.

Table of the Lake Okeechobee Net Inflow Outlooks in feet of equivalent depth. All methods are updated on a weekly basis with observed net inflow for the current month.

| Season                         |               | roley's<br>ethod <sup>1*</sup> | SFWMD<br>Empirical<br>Method <sup>2</sup> |           | Neuti         | ampling of<br>ral ENSO<br>ears <sup>3</sup> | Sub-sampling of<br>AMO Warm +<br>Neutral ENSO<br>Years <sup>4</sup> |           |  |

<sup>\*</sup>Croley's Method Not Produced for This Report

See <u>Seasonal</u> and <u>Multi-Seasonal</u> tables for the classification of Lake Okeechobee Outlooks.

The recommended methods and values for estimating the Lake Okeechobee Net Inflow Outlook are shaded and should be used in the LORS2008 Release Guidance Flow Charts.

\*\*Sub-sampling is a weighted average of ENSO conditions based on the ENSO forecast used.

### Tributary Hydrologic Conditions Graph:

**5800 cfs** 14-day running average for Lake Okeechobee Net Inflow through 07/27/2020. According to the classification in <u>Tributary Hydrologic Conditions</u> table, this condition is Wet.

**-2.16** for Palmer Drought Index on 07/25/2020.

According to the classification in <u>Tributary Hydrologic Conditions</u> table, this condition is Dry.

The wetter of the two conditions above is Wet.

## **LORS2008 Classification Tables:**

### Lake Okeechobee Stage on 07/27/2020:

Lake Okeechobee Stage: 12.93 feet

|                     | ee Management<br>/Band | Bottom Elevation (feet, NGVD) | Current Lake<br>Stage |
|---------------------|------------------------|-------------------------------|-----------------------|
| High Lake Manage    | ement Band             | 16.26                         |                       |
|                     | High sub-band          | 15.83                         |                       |
| Operational<br>Band | Intermediate sub-band  | 15.39                         |                       |
|                     | Low sub-band           | 13.52                         |                       |
| Base Flow sub-ba    | nd                     | 12.60                         | ← 12.93 ft            |
| Beneficial Use sub  | o-band                 | 11.64                         |                       |
| Water Shortage M    | lanagement Band        |                               |                       |

#### Part C of LORS2008: Discharge to WCAs

Up to Maximum Practicable to the WCAs if desirable or with minimum Everglades impact; otherwise no releases to WCAs.

### Part D of LORS2008: Discharge to Tide

Up to 450 cfs at S-79 and up to 200 cfs at S-80.

### Adaptive Protocol's Release Guidance: Caloosahatchee Estuary

The SFWMD's Lake Okeechobee Adaptive Protocol's Release Guidance suggests no S-77 release to the Caloosahatchee Estuary unless the Governing Board recommends otherwise.

### LORS2008 Implementation on 07/27/2020 (ENSO Neutral Condition):

#### Status for week ending 7/27/2020:

**Water Supply Risk Evaluation** 

| Area | Indicator  | Value                                | Color Coded<br>Scoring Scheme |

# **2008 LORS**

Part C: Establish Allowable Lake Okeechobee Releases to the Water Conservation Areas

### **2008 LORS**

# Part D: Establish Allowable Lake Okeechobee Releases to Tide (Estuaries)

## Flowchart to Guide Recommendations for Lake Okeechobee Releases to the Caloosahatchee Estuary for 2008 LORS Baseflow & for Environmental Water Supply (revised 9-Aug-2012)

<sup>&</sup>lt;sup>1</sup>The 2008 LORS Release Guidance (Part D) can suggest baseflow releases in the Intermediate, Low, or Baseflow Subbands.

<sup>7</sup>Should this condition be reached, the Governing Board will be briefed at their next regularly scheduled meeting as part of the State of the Water Resources agenda item.

<sup>&</sup>lt;sup>2</sup>Estuary "needs" water when the 30-day moving average salinity at I-75 bridge is projected to exceed 5 practical salinity units (psu) within 2 weeks.

<sup>&</sup>lt;sup>3</sup>LOWSM = Lake Okeechobee Water Shortage Management.

<sup>&</sup>lt;sup>4</sup>Tributary Hydrologic Condition (THC) is based on classification of Lake Okeechobee Net Inflow and Palmer Index.

<sup>&</sup>lt;sup>5</sup>Can release less than the "up to" limit if lower release is sufficient to reach or sustain desired estuary salinity; cfs = cubic feet per second.

<sup>&</sup>lt;sup>6</sup>After reviewing conditions in Water Conservation Areas (WCAs), Stormwater Treatment Areas (STAs), ENP, St. Lucie Estuary and Lake Okeechobee.

Evaporation - Precipitation: = -NR-" = -NR-"

Evaporation - Precipitation using Lake Area of 730 square miles is equal to -NR
Lake Okeechobee (Change in Storage) Flow is 3933 cfs or 7800 AC-FT

```

- + Flow Due to lockages is computed utilizing average daily headwater and tailwater along with total number of lockages for the day to calculate a volume which is then converted to an average discharge in cfs.
- ++ Preferred flow is determined from either the spillway discharge or the below flow meter daily

\*\*\* NOTE: Discharge (ALL DAY) is computed using Spillway, Sector Gate and Lockages Discharges from 0015 hrs to 2400 hrs.

(I) - Flows preceded by "I" signify an instantaneous flow computed from the single value reported for the day

\* On 11 May 1999, Lake Okeechobee Elevation was switched from Instantaneous 2400 value to an average-daily lake average.

On 14 Mar 2001, due to the isolation of various gages within the standard 10 stations, the average of the interior 4 station gages was used as the Lake Okeechobee Elevation.

On 05 November 2010, Lake Okeechobee Elevation was switched to a 9 gage mix of interior and edge gages to obtain a more reliable representation of the lake level.

On 09 May 2011, Lake Okeechobee Elevation was switched to a 8 gage mix of interior and edge gages to obtain a more reliable representation of the lake level due to isolation of S135 from low lake levels.

Today Lake Okechobee elevation is determined from the 4 Int & 4 Edge stations

++ For more information see the Jacksonville District Navigation website at http://www.saj.usace.army.mil/

| Tributary Hydrologic | Palmer Index   | 2-wk Mean L.O. Net  |
|----------------------|----------------|---------------------|
| Classification*      | Class Limits   | Inflow Class Limits |
| Very Wet             | 3.0 or greater | Greater >= 6000 cfs |
| Wet                  | 1.5 to 2.99    | 2500 - 5999 cfs     |
| Near Normal          | -1.49 to 1.49  | 500 - 2499 cfs      |
| Dry                  | -2.99 to -1.5  | -5000 – 500 cfs     |
| Very Dry             | -3.0 or less   | Less than -5000 cfs |

<sup>\*</sup> use the wettest of the two indicators

# Classification of Lake Okeechobee Net Inflow Seasonal Outlook\*

| Lake Net Inflow<br>Prediction | Equivalent<br>Depth** | Lake Okeechobee  |  |
|-------------------------------|-----------------------|------------------|--|
| [million acre-feet]           | [feet]                | Net Inflow       |  |
|                               | 2000                  | Seasonal Outlook |  |
| > 0.93                        | > 2.0                 | Very Wet         |  |
| 0.71 to 0.93                  | 1.51 to 2.0           | Wet              |  |
| 0.35 to 0.70                  | 0.75 to 1.5           | Normal           |  |
| < 0.35                        | < 0.75                | Dry              |  |

<sup>\*\*</sup>Volume-depth conversion based on average lake surface area of 467,000 acres

# Classification of Lake Okeechobee Net Inflow Multi-Seasonal Outlook\*

| Lake Net Inflow<br>Prediction | Equivalent<br>Depth** | Lake Okeechobee        |  |
|-------------------------------|-----------------------|------------------------|--|
| [million acre-feet]           | [feet]                | Net Inflow             |  |
|                               |                       | Multi-Seasonal Outlook |  |
| > 2.0                         | > 4.3                 | Very Wet               |  |
| 1.18 to 2.0                   | 2.51 to 4.3           | Wet                    |  |
| 0.5 to 1.17                   | 1.1 to 2.5            | Normal                 |  |
| < 0.5                         | < 1.1                 | Dry                    |  |

<sup>\*\*</sup>Volume-depth conversion based on average lake surface area of 467,000 acres

# 6-15 Day Precipitation Outlook Categories\*

| 6-15 Day Precipitation Outlook<br>Categories | WSE Decision Tree<br>Categories |  |
|--|---------------------------------|--|
| Above Normal                                 | Wet to Very Wet                 |  |
| Normal                                       | Normal                          |  |
| Below Normal                                 | Dry                             |  |
