***Subject: Golden Gate Canal Tree Removal Project – Phase 3 2<sup>nd</sup> Notice***

Dear Resident,

The South Florida Water Management District (District) is a regional governmental agency that oversees the water resources in the southern half of the state. Our mission is to manage and protect the water resources of the region by balancing and improving flood control, water quality, natural systems and water supply.

As part of our flood control mission, beginning on or about March 11, 2019 the District and Arbor Tree and Land will be removing trees within the drainage easement along the Golden Gate Main canal from the Golden Gate #2 Structure (GG2) to Livingston Road (see enclosed map). As part of this project, all trees within the drainage easement will be removed. The District will require the removal of unpermitted fences, small sheds, pergolas, gazebos, lighting and/or other improvements situated within the easement. While the District will endeavor to minimize damage to any permitted structures, it is advisable that prior to commencement of the project, all such improvements be removed or safeguarded. In addition, any improvements (i.e., fences, sheds, docks, etc.) within the canal, on the canal bank or within the easement will require a Right of Way Occupancy Permit. Information on District Occupancy permits can be found on the District's website: [www.sfwmd.gov](http://www.sfwmd.gov).

Tree removal will include stump grinding and sodding of disturbed areas, where necessary. Vegetation will also be removed from the canal banks and the areas treated with herbicide to prevent re-emergence. These activities are part of the District's normal cycle of maintenance of its rights-of-way to ensure that canals function optimally during a storm or hurricane event.

District staff will continue to update residents impacted by the project until all work is complete. A website is available for residents to access details and updates to the status of the project at [www.sfwmd.gov/GoldenGateCanal](http://www.sfwmd.gov/GoldenGateCanal). We anticipate tree removal work will be completed by the end of May 2019. Your cooperation will be greatly appreciated during this time. If you have any questions or concerns, please feel free to contact Big Cypress Basin Field Station Field OPS & Maintenance Supervisor Johnathan Askew at 348-7530 ext. 7813, email [jaskew@sfwmd.gov](mailto:jaskew@sfwmd.gov).

Sincerely,

A handwritten signature in blue ink, appearing to read "Lisa Koehler". The signature is fluid and cursive, with the first name "Lisa" and last name "Koehler" clearly distinguishable.
