

# Suitability Indices for Fish Density

- I. As function of annual hydroperiod  
(total number of days inundated)  
applied to Remnant Everglades
- II. As function of years since last drawdown  
applied to Ridge and Slough Landscape
- Geometric mean of function I and II

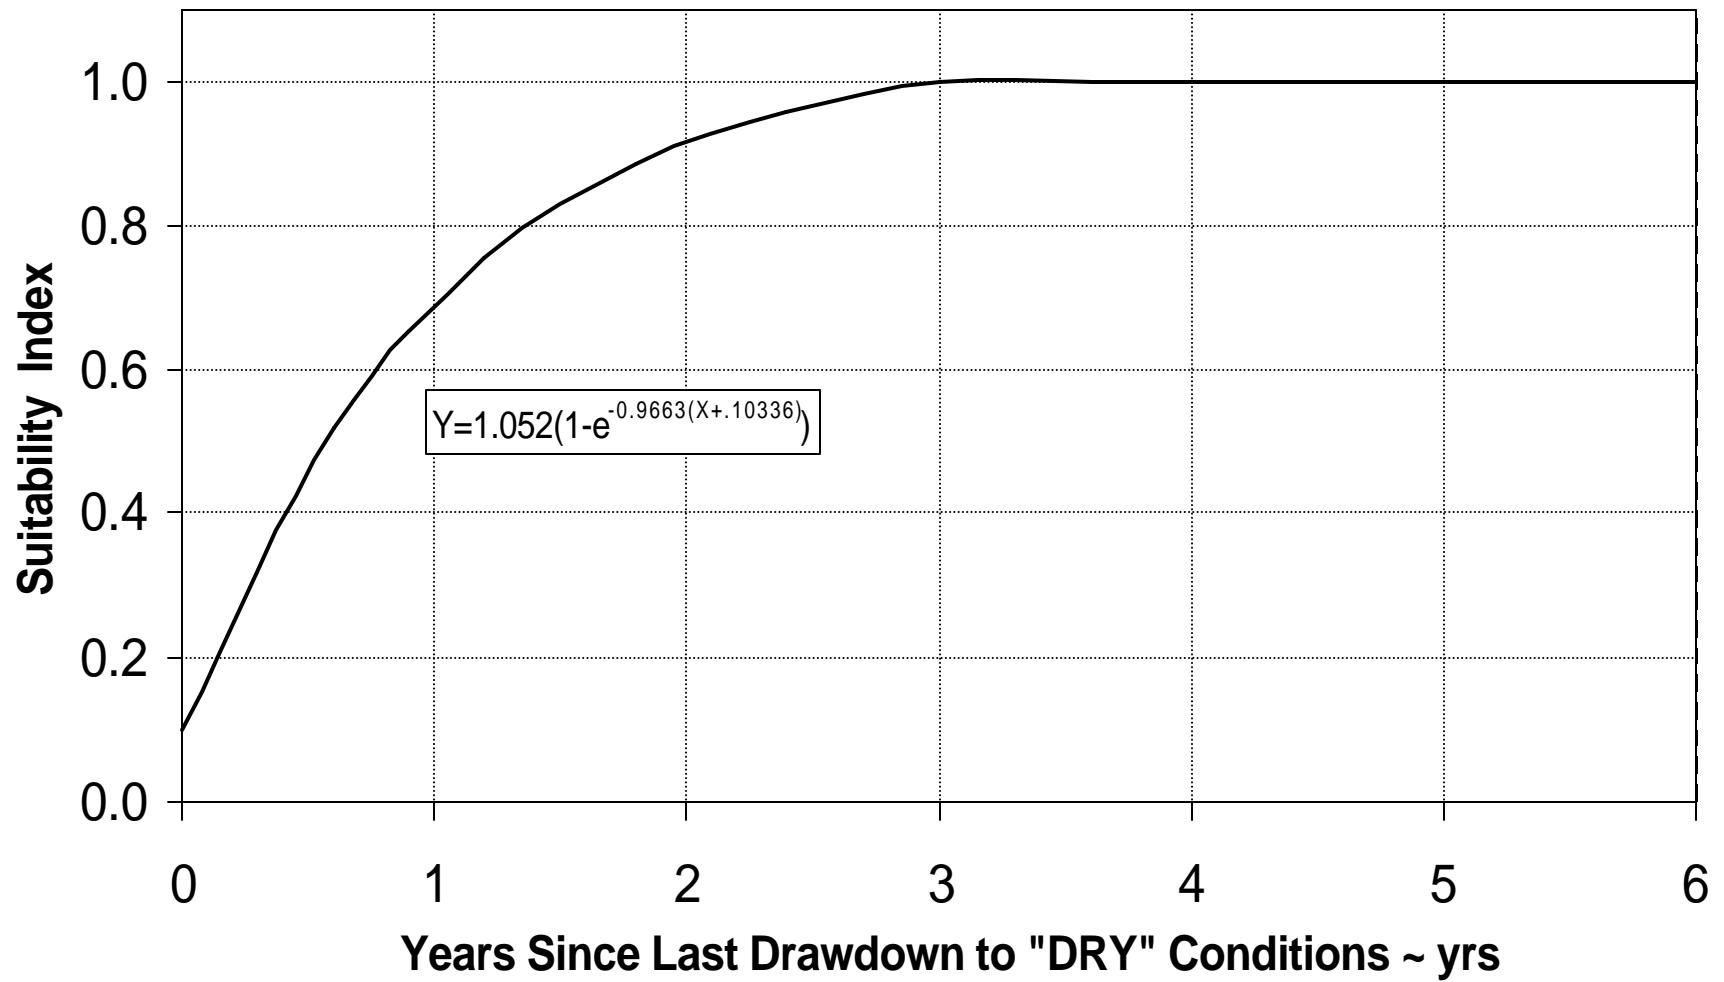

# Fish Density I

Applies to Remnant Everglades

## Fish Density II

Applies only to Ridge and Slough Landscape

# Indicator Regions and SFWMM grid cells Applicable for Fish Suitability
