

Notice

Low Water Level Conditions

Due to low water levels as a result of ongoing construction of the Kissimmee River Restoration Project, the Istokpoga Canal Power Boat Ramp is no longer usable for the launching of motorboats until conditions permit. The Istokpoga Canal Airboat Ramp remains operational and available for use.

Boaters may experience low water level conditions elsewhere within the Istokpoga Canal and Kissimmee River. For the duration of the restoration construction project, access to the River will be closed to navigation in a 7.5-mile stretch of the C-38 Canal that is being backfilled north of the Highway 98 bridge.

For more information on navigation notices in the area, please visit the South Florida Water Management District's navigation website at:

<https://www.sfwmd.gov/community-residents/recreation/navigation>

For more information on the Kissimmee River Restoration Project, please visit the U.S. Army Corps of Engineers website at:
