

Experimental native Apple Snail (*Pomacea paludosa*) rearing tanks.
Structure S5A, December 2011

Scientist Rachael Pierce checks on Apple Snails for use in Lemkin Creek optimum stocking density experiments. S5A experimental snail grow out facility, December 2011

Young snails in Southern Naiad (*Najas guadalupensis*). Netting above helps prevent predation by birds and other animals.

S5A experimental snail grow out facility, December 2011

**Belted Kingfisher (*Ceryle alcyon*),
On the way to Lake Okeechobee, December 2011**

Red-shouldered Hawk (*Buteo lineatus*),
On the way to Lake Okeechobee, December 2011

Supervising Scientist Therese East (with back to camera) and Scientist Eric Crawford prepare sighting poles for new experimental enclosures. Lemkin Creek, December 2011

**Poles are up! These enclosures will be used for testing native Apple Snail stocking densities.
Lemkin Creek, December 2011**

Frog eggs in Muskgrass (*Chara zeylanica*)
Lemkin Creek, December 2011

Wood Storks (*Mycteria americana*)
Lemkin Creek, December 2011

Narrow-winged Damselfly (Fam. *Coenagrionidae*),
Lemkin Creek, December 2011
