

Alternative Water Storage and Disposal Interim (AWSDI) Projects – Fisheating Creek (TIFF)

Location:	Glades County
Subwatershed:	Fisheating Creek
Basin:	TBD
Purpose:	Utilize interim facilities for water storage by employing a range of site alternative measures at a number of project sites. Alternatives include construction of on-site measures such as temporary ditch blocks, minor berms, minimal earthwork, wetland restoration, and potential water diversions to the project site using temporary pump facilities.
Project Operation Start:	TBD
Considerations/Update:	No new information available
