

Alternative Water Storage and Disposal Interim (AWSDI) Projects – Indian Prairie (TIIF)

Location:	-
Subwatershed:	Indian Prairie
Basin:	-
Purpose:	Utilize interim facilities for water storage by employing a range of site alternative measures at a number of project sites. Alternatives include construction of on-site measures such as temporary ditch blocks, minor berms, minimal earthwork, wetland restoration, and potential water diversions to the project site using temporary pump facilities.
Project Operation Start:	TBD
Considerations:	No new information available
