Dear «Name»,

This letter is to inform you that land in your ownership is in the footprint of a potential Comprehensive Everglades Restoration Plan project called the Lake Okeechobee Watershed Restoration Project.

Previous workshops have been held in various stages of the project's development, which you may have attended. The purpose of this project is to restore more natural water deliveries to Lake Okeechobee and improve its health, as well as that of the estuaries and surrounding wetlands.

The South Florida Water Management District will be conducting an additional public workshop to discuss the current status of this project. As a land owner identified as having a possible interest in the Lake Okeechobee Watershed Restoration Project area, you are invited to participate and share your input in this workshop.

The public workshop will be held on June 18th, 2018, from 6:00 p.m. to 7:30 p.m., at the Indian River State College, Williamson Conference and Education Center, 2229 N.W. 9th Avenue, Okeechobee, Florida.

The workshop will provide information on the Lake Okeechobee Watershed Restoration Project. Additional information is available on the South Florida Water Management's website at www.sfwmd.gov/LOWRP.

If you have questions regarding the Lake Okeechobee Watershed Restoration Project or would like additional information, please feel free to contact me at your earliest convenience. I can be reached by telephone at (561) 682-6088 or by email at jleeds@sfwmd.gov.

Sincerely,

Jennifer Leeds
Section Administrator
