

Duane Piper

Information Technology

Duane Piper became the agency's Chief Information Officer in 2011. He brings 25 years of Information Technology experience, including 11 years at the District and 14 years in the private sector, helping businesses remain competitive through the efficient use of technology. His experience with large information systems in complex operational environments includes international and multi-site settings in the manufacturing, database and publishing industries.

Piper earned his Bachelor of Science in Computer Science from Florida Atlantic University and a Master of Science in Management of Technology from the Georgia Institute of Technology. He is also a Certified Project Manager (PMP) and a Certified Information Systems Security Professional (CISSP).

Additionally, Piper serves on the Technical Advisory Committee for the Palm Beach County School Board.

Information Technology supports critical work throughout the agency. Piper supervises network infrastructure, systems engineering, software applications, data security and desktop resources. He and his staff enable District functions that include Everglades restoration modelling, project planning and design, geospatial mapping and water resource and water supply monitoring and analysis. They also manage systems that support the agency's financial and regulatory operations.
