

Canal 18 Restoration-Revegetation Program

Limestone Creek Area South

A District constructed project (partially funded by DOT mitigation) opened the westerly closed end of the original Limestone Creek. The project included connecting an isolated body of water to the Limestone Creek channel.

Limestone Creek Area (South)Restoration Property Owners Association is a project spearheaded by Robert Cotleur (Cotleur & Hearing) and funded by Loxahatchee Preservation Initiative Funds in cooperation with the Town of Jupiter and area residents. The project enhanced the largest remaining portion of the original Limestone Creek by selective dredging to improve flushing, exotic vegetation removal, native re-vegetation and rip-rap placement.
